Portfolio: mahumhaider.com | LinkedIn: linkedin.com/in/Mahum-Haider
GitHub: github.com/Mahum-Haider | Email: mahum.haider@gmail.com

Technical Skills

Cloud Infrastructure & Networking: AWS (EC2, Lambda, API Gateway, S3, DynamoDB, RDS/Aurora, VPC, ALB, Auto Scaling, CloudFront, Route 53, IAM, KMS, Organizations, SCPs, SQS, SNS, CloudTrail, Config)

IaC & DevOps Automation: Terraform, CloudFormation, Docker, Kubernetes, CI/CD (GitHub Actions), Linux, Bash

Programming & Data Systems: Python (Flask), JavaScript (Node.js), PostgreSQL, MySQL, RESTful APIs, Auth0 (RBAC)

Project Work

Cloud Artist Platform: Serverless AI Intelligence System | *AWS Lambda, API Gateway, DynamoDB, S3, IAM, KMS*

- Architected a serverless, event-driven AI platform using S3, Lambda, API Gateway, DynamoDB, and Amazon Rekognition to process and analyze uploaded artwork.
- Designed secure API workflows with API Gateway and Lambda, integrating DynamoDB for scalable metadata storage and retrieval.
- Implemented least-privilege IAM roles and KMS encryption while configuring secure access between AWS services.
- Provisioned cloud infrastructure with Terraform and implemented CloudFront-backed S3 delivery for a scalable, secure web architecture.

AWS Multi-Account Governance & Security | *AWS Organizations, SCPs, IAM, CloudTrail, AWS Config*

- Designed a multi-account AWS environment using Organizations and OUs for development, staging, and audit workloads.
- Authored centralized Service Control Policies (SCPs) to enforce security guardrails, restrict regions, and prevent unauthorized actions.
- Configured centralized billing and organization-wide audit logging using AWS CloudTrail, AWS Config, and Amazon S3.

AWS Highly Available Web Application | *EC2, ALB, Auto Scaling, Route 53, Aurora, VPC*

- Engineered a fault-tolerant multi-tier architecture using ALB and Auto Scaling across Availability Zones.
- Configured a custom VPC with public/private subnets, NAT Gateways, and Aurora Multi-AZ for high availability and database failover.

DevSummit High-Throughput URL Shortener | *Python, Flask, DynamoDB, API Gateway, CloudFront*

- Built a scalable URL redirection service with Python/Flask, API Gateway, and DynamoDB, with CloudFront for improved performance.

Additional Technical Projects:

- Containerized Deployment: Deployed a Flask app to AWS EKS using `eksctl`, `kubectl`, IAM, and Kubernetes YAML manifests.
- Full-Stack Applications: Built Casting Agency API (Flask, Auth0 RBAC, Heroku), Fyyur (Flask, PostgreSQL), Trivia API, and NLP Evaluator.

Professional Experience

MedTaskly | Cloud Consultant | Jan'25 - Present

- Designed and deployed a KMS-encrypted, audit-logged AWS security foundation (S3, IAM, CloudTrail, AWS Config) for client billing data using Terraform, replacing shared credentials with least-privilege, MFA-enforced access.
- Identified and resolved a KMS key-policy gap blocking CloudTrail/Config service integration, ensuring end-to-end audit logging and continuous compliance monitoring.
- Built a serverless, event-driven claims pipeline (S3, Lambda, DynamoDB) that parsed and validated uploads, calculating clean claim rate, denial trends, and aging A/R metrics automatically.
- Delivered a real-time reporting API (API Gateway, Lambda) powering a client-facing dashboard and eliminating manual reports.

Venus Aesthetics

Senior Front-End Web Developer | June '22 – June '24

Front-End Web Developer | Feb '21 – May '22

- Built the company's website from the ground up using HTML, CSS, and JavaScript, establishing a scalable front-end foundation.
- Led development of responsive, interactive interfaces and API-driven features using Angular, Node.js, and related front-end technologies.
- Managed website deployments, hosting configuration, and production troubleshooting using Git/GitHub to maintain and deliver changes.
- Optimized front-end performance, cross-browser compatibility, SEO, and user experience, contributing to a 30% increase in website traffic and user engagement.

Aiken House | Volunteer | Mar '19 – May '19

- Video production, content development, event media, and influencer/brand outreach.

Road Crew Media | Communications Officer | Jan '16 – Jul '17

- Supported digital media campaigns, communications strategy, press releases, newsletters, and marketing materials.

Education

National University of Science and Technology (NUST)

B.S. in Mass Communication - Track: Electronic Media | Minor: Program Production and Development, 2015

Udacity Nanodegrees: Full Stack Web Developer (2022) · Front End Web Developer (2020) · Web Developer Bootcamp (2020)

University of Pennsylvania (online): Introduction to Python Programming · Computational Thinking for Problem Solving
